

GARLOCK® PREMIUM GRADE EPDM ELASTOMER

STORAGE INSTRUCTIONS

1. Store in a cool, dry area.
2. Do not expose to greases, oils, or solvents in liquid or vapor form.
3. Prevent exposure to ultra-violet (UV) light, direct sunlight or strong fluorescent lights.
4. Do not store near devices, which produce ozone (O3).
5. Following extended storage, carefully inspect the material for damage.
6. If in doubt concerning any of the above provisions, consult the factory.
7. No other storage requirements above ANSI N45.2.2 are necessary.

Shelf life for premium grade EPDM material is 7-10 years, based on ideal storage conditions.
