

STYLE 8922

Every fiber in this proprietary SYNTHETAK® packing is completely impregnated with PTFE by a special Garlock manufacturing process. All internal voids are filled, eliminating the dry centers left by other packing treatments. A carefully applied high-temperature surface lubricant eases start-up. Style 8922 offers the clean, dependable service where contamination is a concern. It is a true general service packing for many types of rotary and reciprocating services.

TEMPERATURE:	-170°F to +550°F (-110°C to +288°C)
PH RANGE:	0 - 12
SHAFT SPEED:	To 2500 fpm Plus
PRESSURE:	To 500 psi (35 Bar) Rotary/Centrifugal 2500 psi Valves
CONSTRUCTION:	LATTICE BRAID®

STYLE 8922-NO LUBE

The same product as described above, but without the final surface break-in lubricant.
