

## PACKMASTER® 5

A highly abrasion-resistant packing braided from aramid filaments, impregnated with PTFE, with an added “built in” high temperature lubricant for easier run-in.

A superior replacement for asbestos packings with PTFE, withstands granular and abrasive slurries found in numerous areas such as mine dewatering pumps, sewage treatment wash and slurry pumps, reactors, mixers, drilling mud pumps, dewaxing units, and water intakes with sandy, gritty conditions.

**TEMPERATURE:** To +500°F(+260°C)

**PH RANGE:** 2 - 12

**SHAFT SPEED:** 2500 fpm (12 m/s)

**PRESSURE:** To 500 psi (35 Bar) Rotary/Centrifugal

**CONSTRUCTION:** LATTICE BRAID®
